LAND COVER

DAMS

PRECIPITATION LEVELS

THREE MAIN ZONES

Core Zone:

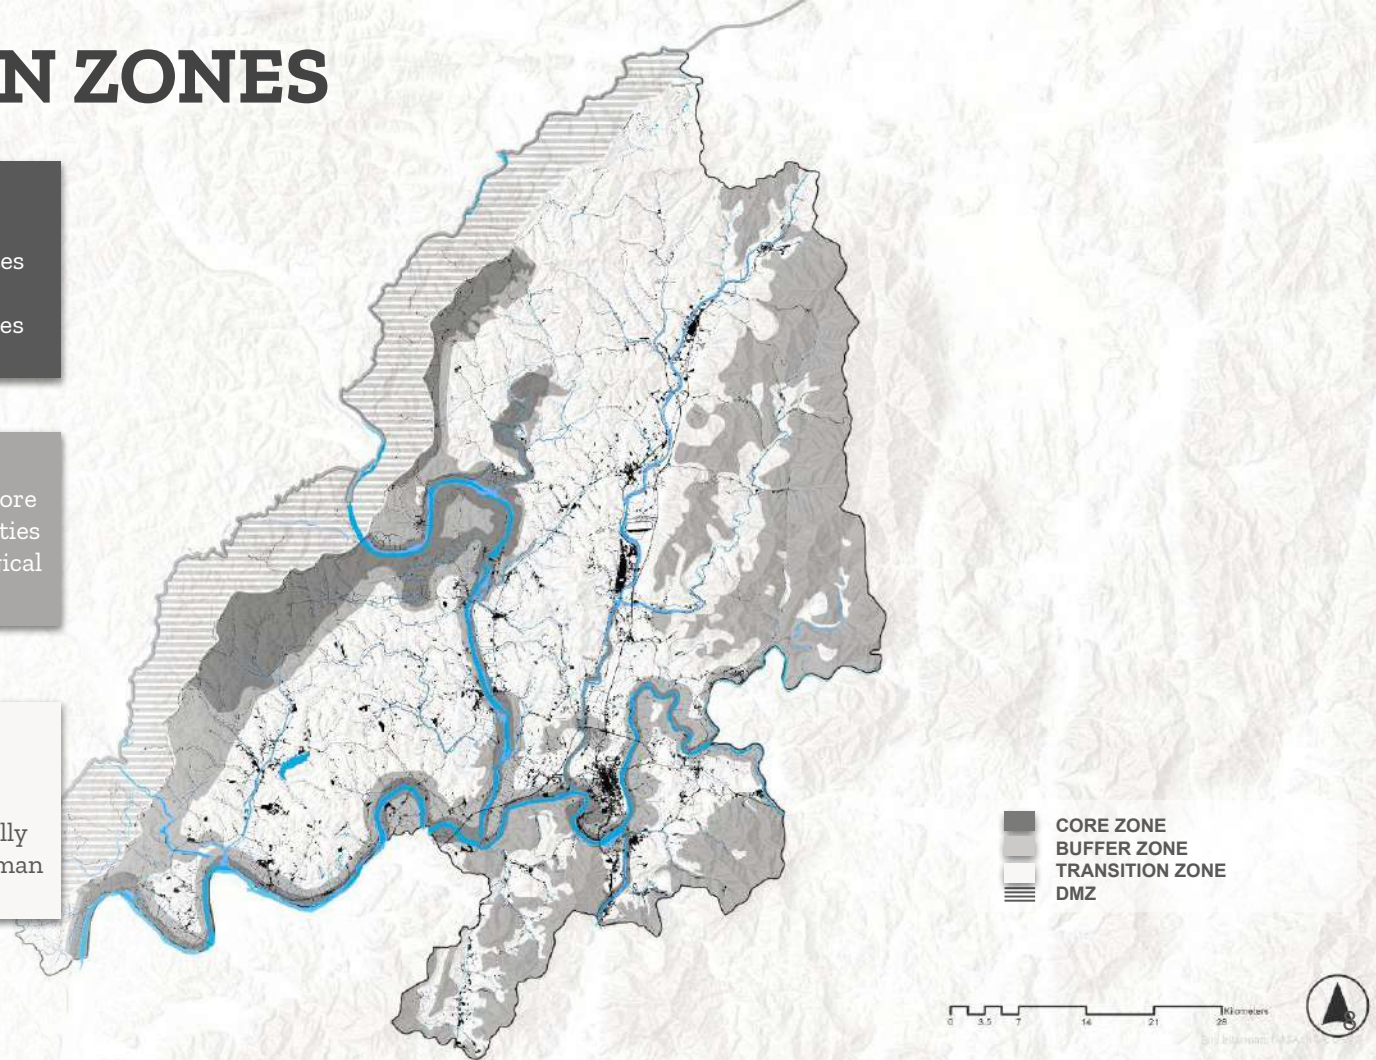

- They comprise a strictly protected zone that contributes to the conservation of landscapes, ecosystems, species and genetic variation

Buffer Zone:

- They surround or adjoin the core area(s), and are used for activities compatible with sound ecological practices.

Transition Zone:

- The transition area is where communities foster socio-culturally and ecologically sustainable economic and human activities.

BIODIVERSITY CONSERVATION AREAS

White-naped crane
(*Antigone vipio*)

Red-crowned crane
(*Grus japonensis*)

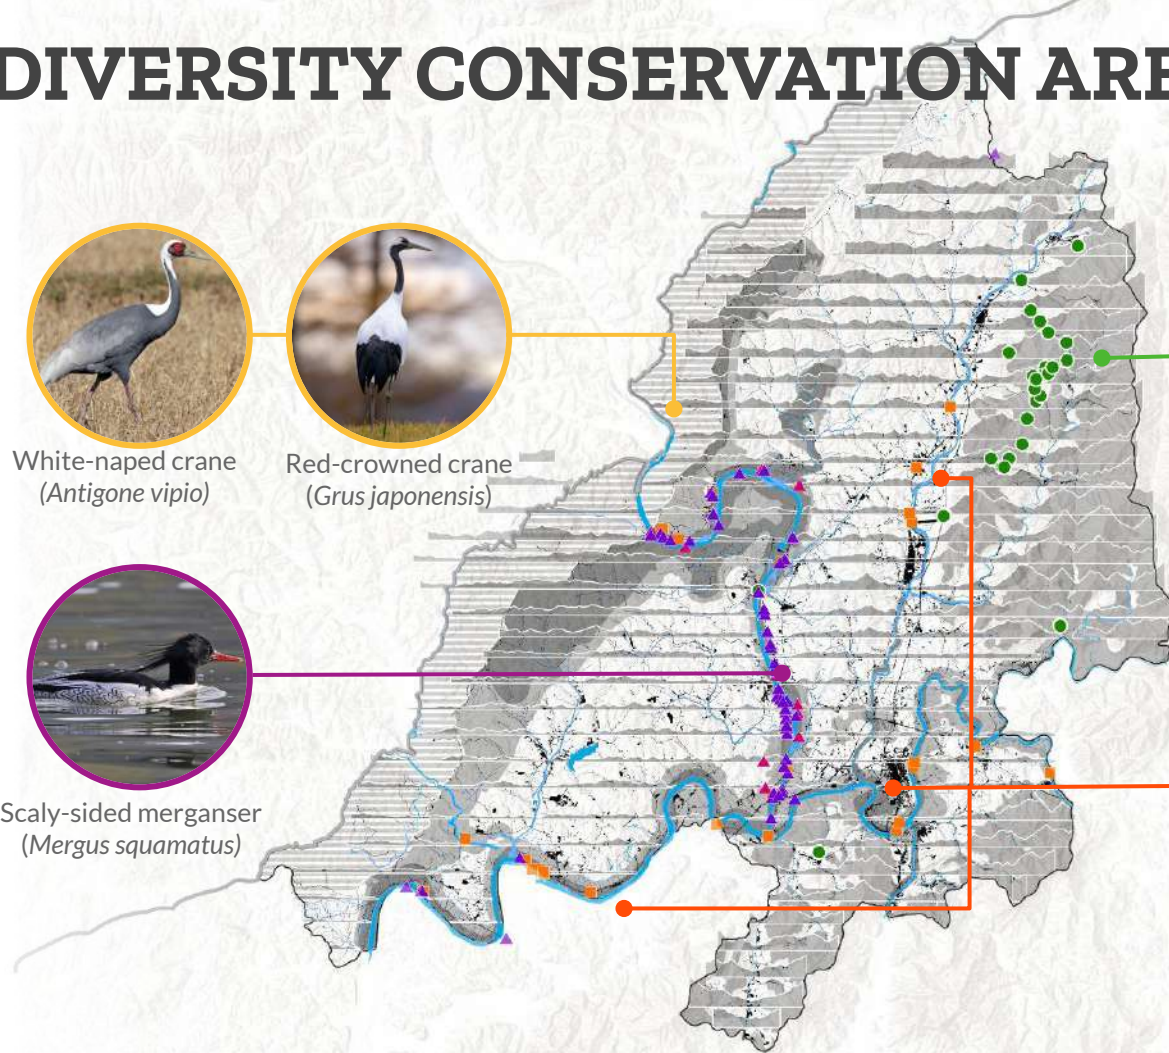

Scaly-sided merganser
(*Mergus squamatus*)

Fairy Pitta
(*Pitta nympha*)

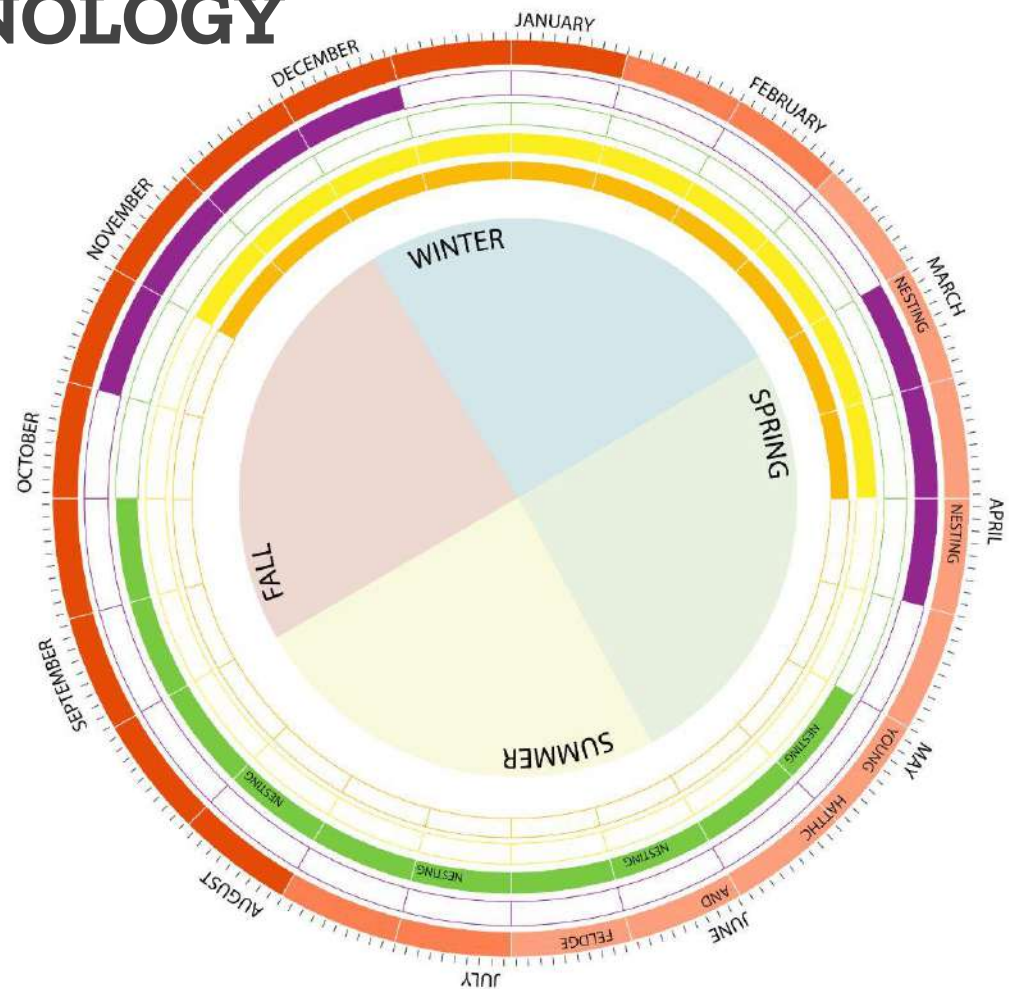

Long-billed plover
(*Charadrius placidus*)

0 3.5 7 14 21 28 Kilometers

ROAD AND TIME DISTANCE

A topographic map of a mountainous region, likely a watershed, with a river flowing through it. A large area in the center is shaded in a darker tone. A green arrow-shaped banner is overlaid on the map, pointing from left to right.

Background Analysis

Key Takeaways

**What did we look
at?**

**What did we find
important?**

RISKS

Bird disturbance
from tourism

Rapid Urban
Development

Risk for flooding
downstream due to slope
of basin

UNESCO BIOSPHERE GOALS

Conservation

Economic
Development

Logistic
Support

OPPORTUNITIES

Potential for tourists to
see rare birds

Economic growth

Ability to benefit from
attraction of geopark sites

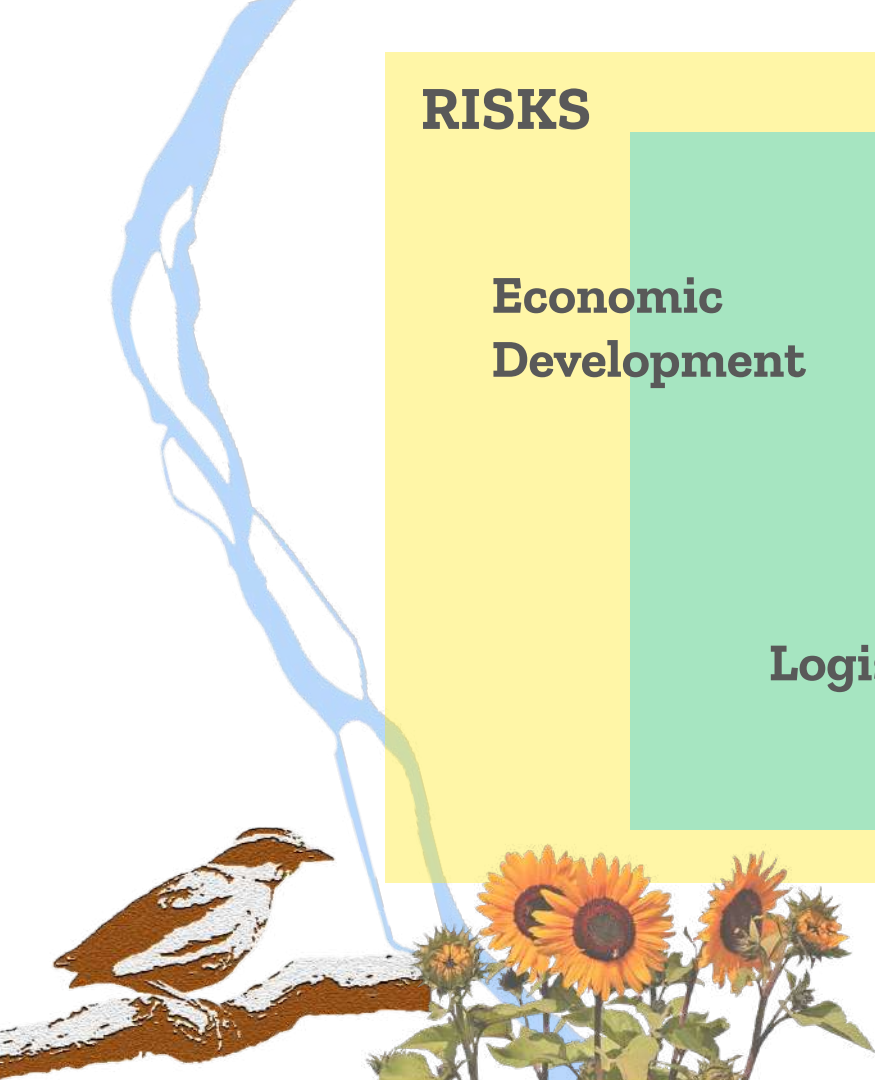

RISKS

**Economic
Development**

OPPORTUNITIES

Conservation

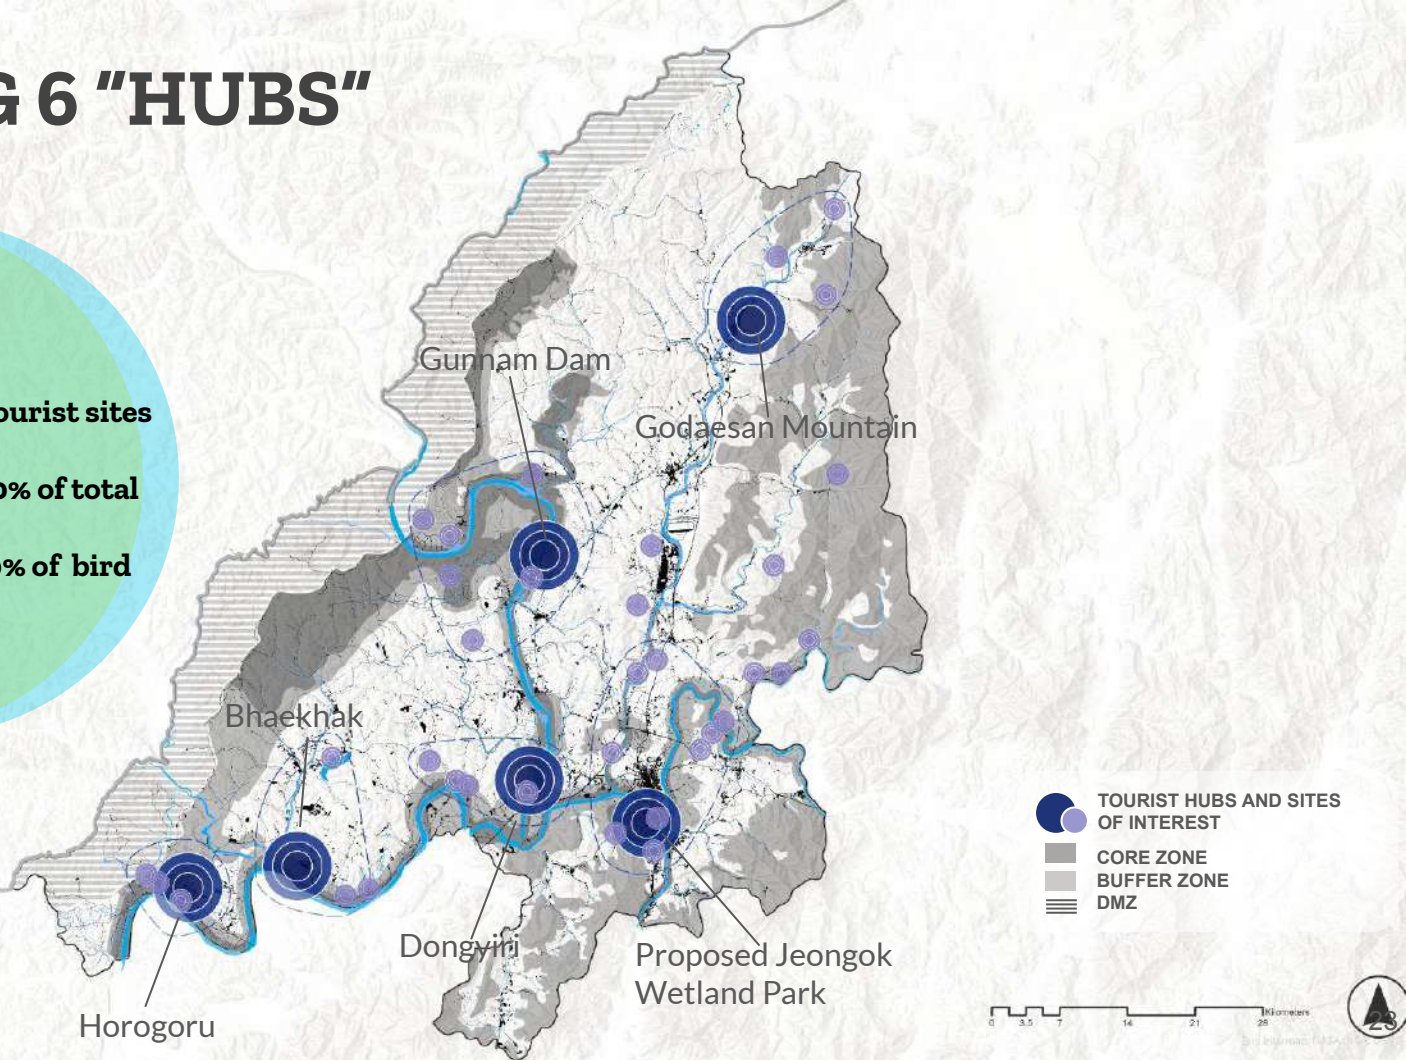

Logistic Support

CHOOSING 6 "HUBS"

With in **5 mile** distance

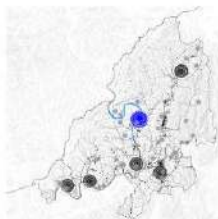

- Offer at least 2 tourist sites at each hubs
- Cover at least 50% of total tourist sites
- Cover at least 60% of bird presence points

EXISTING CONDITIONS

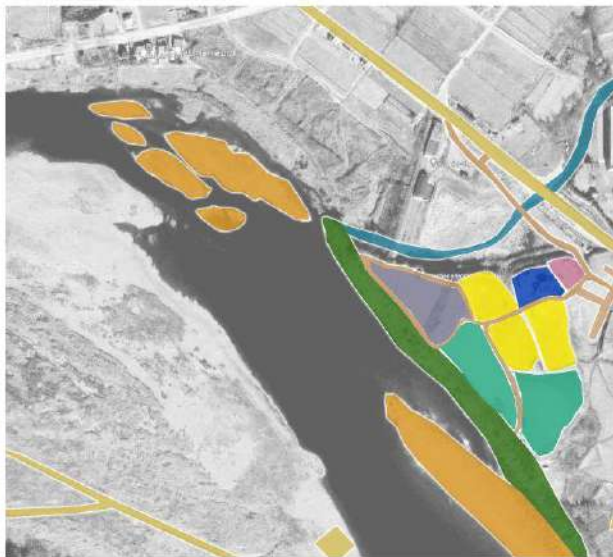

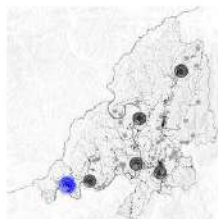

GUNNAM DAM

- SHINGLE DEPOSITION BARS
- STREAM
- ROADS-DRIVEABLE
- BASEBALL PARK
- UNUSED/EMPTY OPEN SPACE
- BOARDWALK
- FLOOD CONTROL CRANE PARK

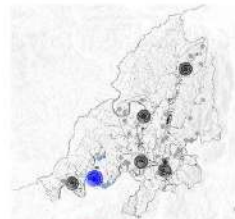

HONGURU

- SHINGLE DEPOSITION BARS
- STREAM
- ROADS-DRIVEABLE
- WALKING TRAIL
- UNUSED/EMPTY OPEN SPACE
- SUNFLOWER FESTIVAL
- VISITORS CENTER
- HOROGURU FORTRESS

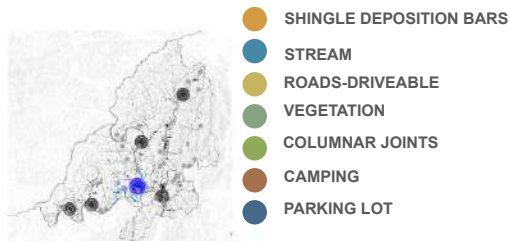

BAEKHAK

DONGYIRI HUB

EXPERIENCE THE HUBS

Good practices

Start from visitor center

Enjoy the unique wildlife at every hub

Visit the cultural centers

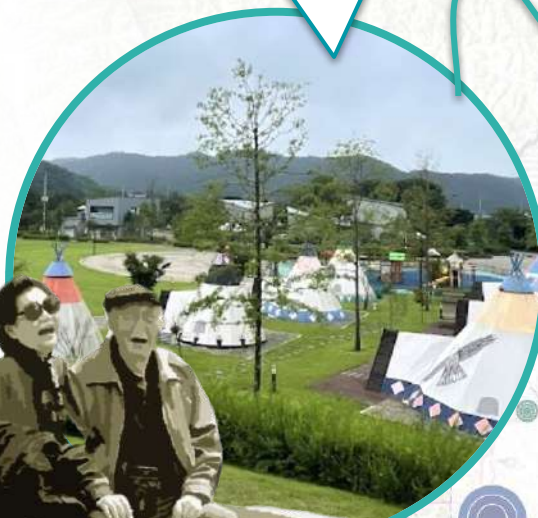

Follow all signage, trail and instructions

A DAY IN YEONCHEON

1

- Arrive in Yeoncheon
- Settle down in the Hantang Tourist Area

- Head over to the Jeongok-ri prehistoric site museum
- Afterwards go explore the beautiful soil stratum at Jeongok

2

- Finally, enjoy the biosphere's geological beauty at the Eundaeri

3

0 3.5 21 28 Kilometers

A WEEK IN YEONCHEON

1

- Arrive at Sintan-ri Station
- Appreciate the cultural history of the Korea peninsula by going to Yeolsoe observatory
- Spend a day hiking Godaesan Mountain
- Stay in a cozy bed and breakfast in the town of Sinseo-myeon

2

- Spend a day hiking the Pyeonghwa Nuri Trail
- Either hike or shuttle to Samgot-ri campsite and set up
- Stay for two nights and see the typhoon observatory, Imjingang Peace Marsh Eco Park, and more!

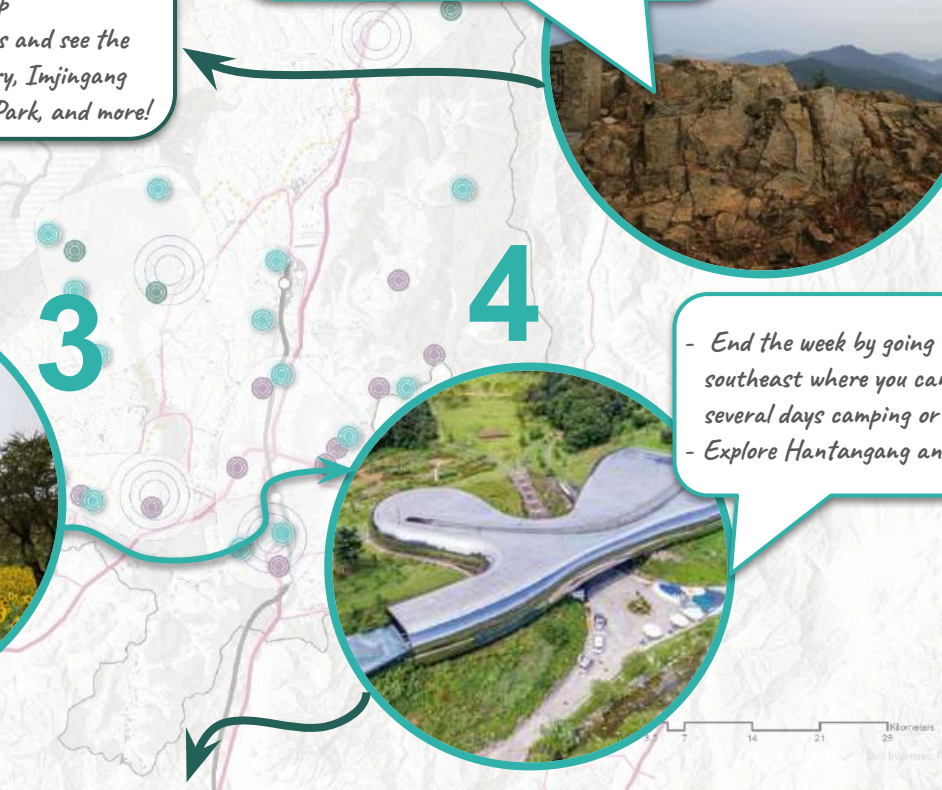

3

- Move down south to a campsite in the Jangnam-myeon area
- Explore the historic park and Horogoruseong fortress

4

- End the week by going to the southeast where you can spend several days camping or in hotels
- Explore Hantangang and Jeongok!

A FIELD TRIP TO YEONGCHEON

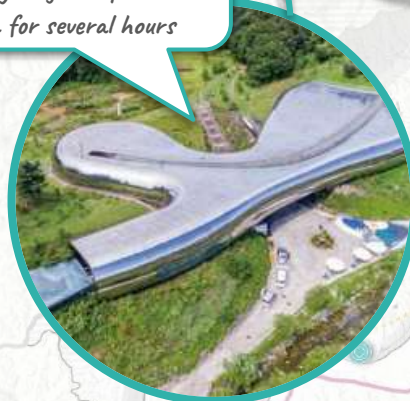

- Head up north to have lunch and explore the Crane Theme Park Fish Course Eco Park

2

- Start in the Hantangan Tourist Area
- Explore the Jeongok-ri prehistoric site museum for several hours

1

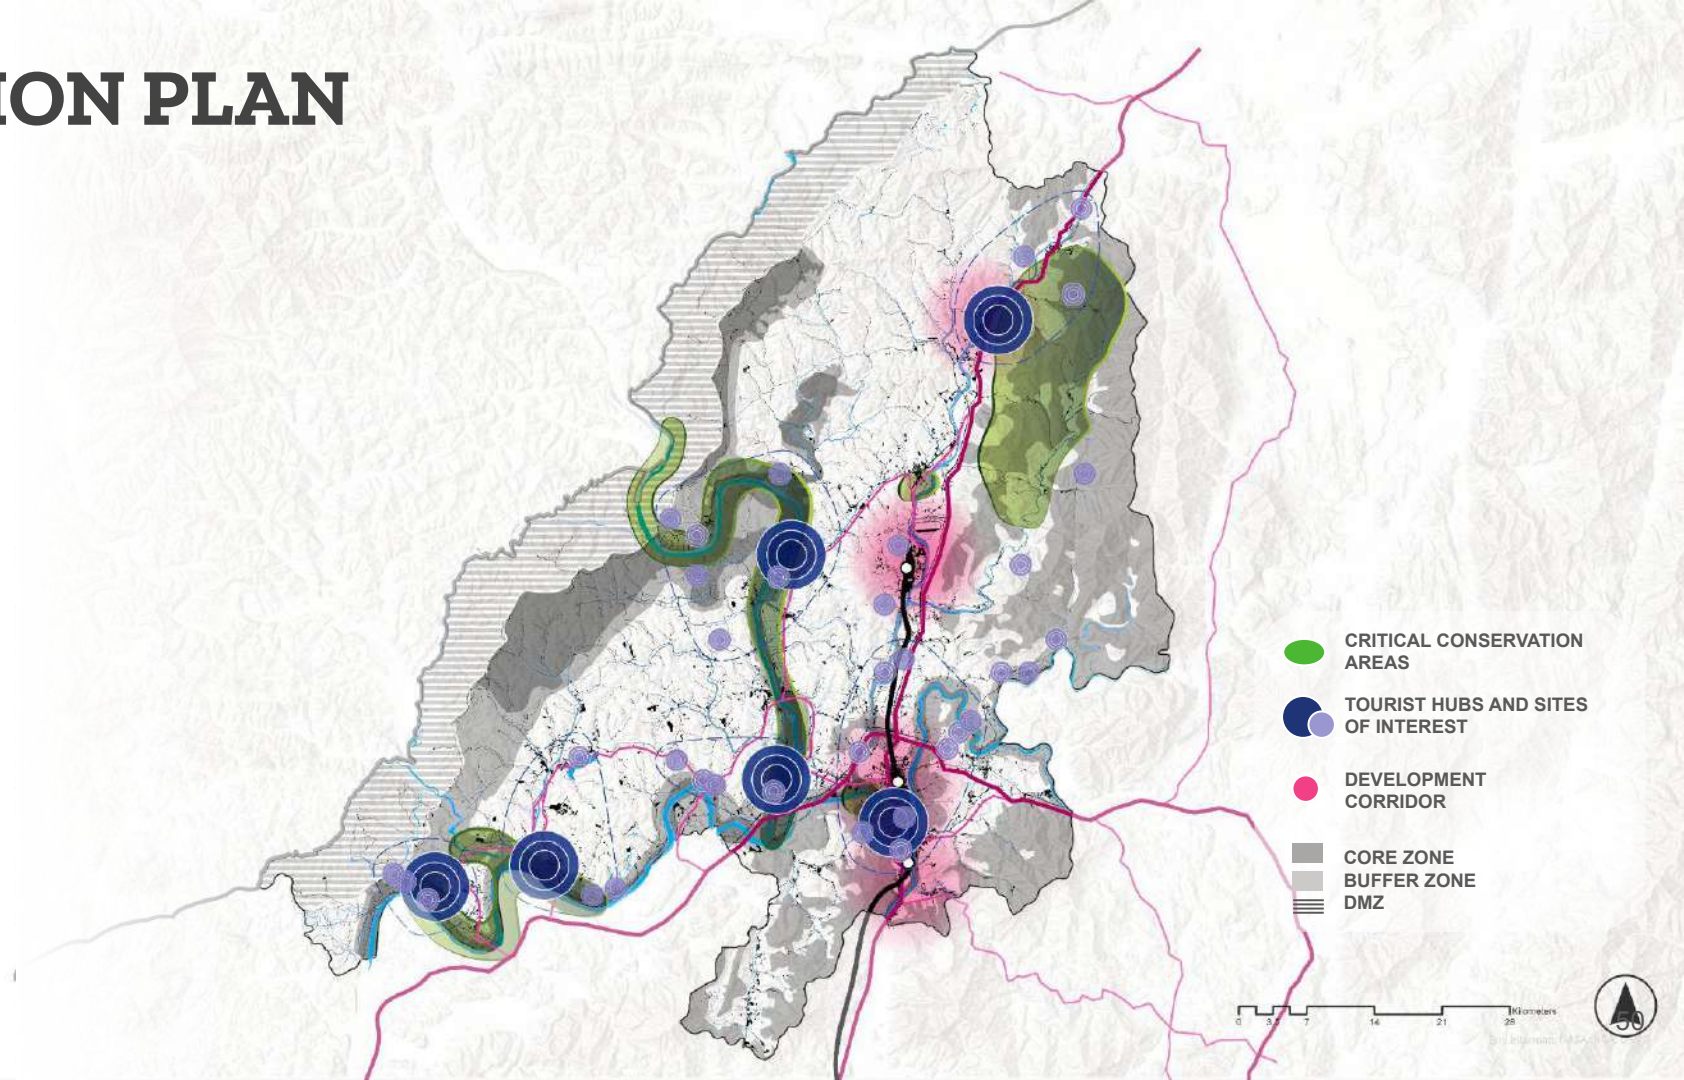

- End the day by driving by Jaemin falls on the schoolbus!

3

VISION PLAN

KEY TAKEAWAYS

Addressed opportunities and mitigated risks for conservation tourism + biological diversity in biosphere

Identified six hubs most suitable for sustainable development

Developed policies, plans, + interventions

THANK YOU!
